

ARGUS CARGO MANAGEMENT SYSTEM

Comprehensive Platform Features & User Guide

A premium enterprise freight and communications platform.

Tailored for Cargo Operators, Sales Persons, Calling Agents, Admins, and Customers.

Equipped with WebSockets, server-side 3CX Webhook integrations, and automated PDF builders.

Core Overview & Live Dashboard

Operations & Shared Workspace Hub

- Global Overview:** Provides a birds-eye view of all ongoing shipments, pending inquiries, and active queries.
- Dynamic Status Indicators:** Uses dynamic badges in the sidebar to flag new customer/vendor email responses.
- Real-time Notifications:** System-wide sounds and alerts notify operators when status updates occur.
- Premium Layout:** Fully responsive dark-mode and light-mode compatible layout using glassmorphism aesthetic.

Freight & RFQ Management

Shipments, Vendor Requests, and Invoicing

- Carrier:** Easily input cargo specifications (POL, POD, commodity, dimensions, weight, carrier of choice).
- Log:** A master log tracking all sent requests. Color-coded status updates (Pending, Quoted, Closed).
- Shipments:** Active bookings containing automated PDF generation and cargo documents.
- Dashboard:** Consolidated logs displaying total costs, profits, and carrier analytics.
- Address Book:** Shared address book mapping customer/vendor details, emails, and default ports.

Calling Agent Portal & Enquiries

Call Log Capture, and 3CX Telephony Integration

Form Creator: A manual form allowing agents to log caller data, contact info, and notes.

Table: Displays logs of all dialed and received inquiries with the exact Time of Call.

Lead Assignment: Marking an inquiry as a 'Lead' triggers an algorithm assigning it to the

Integration: Server-side CRM XML integration routes call logs to the database automatically.

Global Call Popup: When a call terminates, the agent receives an immediate global modal alert to catalog

Admin Control Center

Administration, Security, and Configuration Settings

- Creation Page:** Admin panel to create Operator, Admin, Sales, Calling Agent, or Customer accounts.
- Extension Mapping:** Inline editable grid enabling admins to bind 3CX extension numbers to ARGUS accounts.
- Integration:** Configures individual IMAP and SMTP configurations for safe and secure client email access.
- Account Actions:** Active account stalling (suspend logins) and permanent user deletion panels.

Automated Quotation Engine

PDFs, Smart Port Parsing, and Terms Merging

Conversion: Compiles shipment data into structured PDFs using headless server-side conversion.

Extraction: Automatically parses port parentheticals (e.g. Coimbatore International Airport).

Merging: Automatically appends your premium static terms page (Argus_Ambient_Premium_Terms).

Email Automation: One-click emailing of generated quotes directly to customer mailboxes.
